

Memorex gets the word around.

Memorex offers a line of dependable, high quality products for every step in the word processing cycle. And since we get the word around more economically than most of our competitors, we'd like to take this opportunity to summarize those products currently comprising the family. Remember—WORD PROCESSING MEANS MEMOREX.

Dictating

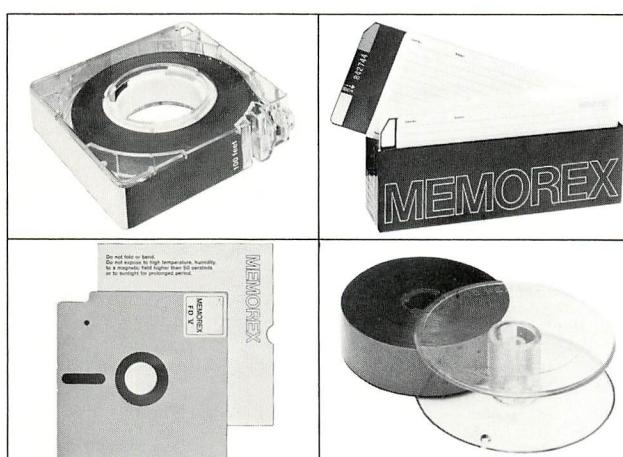

Memorex offers all three styles of dictating media: belts, cassettes and discs, and all offer dependable, true-to-life voice reproduction at an economical cost to you.

Typing/Editing

Memorex offers a wide variety of magnetic media, including the IBM compatible magnetic tape cartridge, the writable and non-writable magnetic card for use on all original manufacturers equipment regardless of style, and a floppy disc for the latest generation text editors.

Memorex also carries a full line of typewriter ribbons for use on the IBM typewriter lines. All of the above is offered to you at an economy and with a one-year warranty.

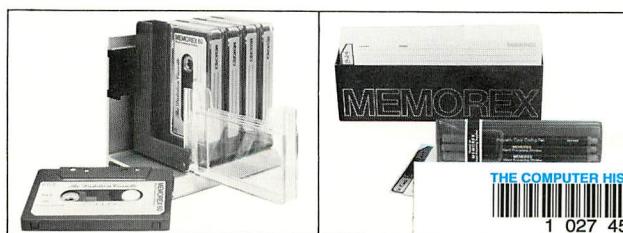

Copying

Memorex toners for Xerox and IBM machines offer crisp copies at a nice savings and with quality that can't be beat. The same is true of Memorex's developers for Xerox copiers, which guarantee a 50% longer life than competitive brands.

Distribution/Filing

An assortment of Memorex accessories make distribution and filing tasks easier, including handy libraries for storing dictation cassettes, special pens and storage folders for mag cards, and even a desk top file box provided free with mag card orders.

MEMOREX

Sales Offices

Ordering Addresses—Orders can be forwarded to the nearest Memorex Corporation office listed or contact the authorized Memorex Word Processing dealer in your area.
