

MEMOREX

Magnetic Tape Cartridge for
MT/ST, MT/SC, 50 Data Inscrber

Memorex Type 90 Tape Cartridge... 100% compatible with IBM MT/ST, MT/SC and Model 50 Data Inscrber

Thoroughly proven in both lab and field tests, the Memorex Type 90 Tape Cartridge offers users dependable, long-lasting service. It is electrically and mechanically identical to cartridges supplied by the equipment manufacturer. Whether your application is power typing, repetitive typing, type composition or computer input... Memorex's cartridge is warranted totally compatible with the equipment on which it is used.

Computer product quality standards

Made by the leading manufacturer of precision computer tape, Memorex Type 90 Tape Cartridges are representative of computer industry quality standards. Their magnetic surfaces are coated with the same oxide formulation used on millions of reels of error-free computer tape. Perforations, guide slots and other mechanical features are held to the same tight physical tolerances maintained in other Memorex precision products.

Durable cartridge

Cases for the Type 90 Tape Cartridge are made from durable G.E. Lexan®. This dimensionally-stable substance is injection molded into a precision cartridge which has unusually high impact strength and heat resistance. Its distinctively ribbed side panels resist scratching, yet allow operators to easily gauge the quantity of tape inside.

Replaceable identification labels

Identification labels, supplied with each Type 90 Tape Cartridge, are readily removed and replaced. They allow operators to conveniently identify the contents of their tapes, and to change identification when a cartridge is reused.

One year warranty

Type 90 Tape Cartridges are subjected to rigid computer tape electrical tests, and are individually identified with batch and lot. In accordance with the published Memorex Warranty, any defective cartridge will be replaced free of charge within one year from the date of purchase.

Memorex...
a highly reliable source for
precision magnetic products

Memorex is the world's leading supplier of precision magnetic media. Data processing managers safeguard their irreplaceable computer data by using Memorex's new Quantum tape. Stations recording signals from outer space rely on Memorex tape to faithfully capture scientific information. And there's a good chance that pictures you saw of the last Winter and Summer Olympic Games, or any major television show for that matter, were recorded on Memorex video tape. You can have similar confidence in Memorex magnetic tape cartridges.
