INTEROFFICE CORRESPONDENCE

TO: Sales Engineers

DATE: 7 December 1967

FROM: ✓ Chuck Scarbrough
Technical Service Center

COPY TO: N. N. Denney

SUBJECT: RECOMMENDED RECORDING REFERENCES AND SPECIFICATIONS

The following list of documents will, (1) prove invaluable for initial familiarization with magnetic recording techniques and, (2) delineate a portion of the many specifications that magnetic tape must meet. Subject documents will subsequently serve as handy references for most recording methods, as they do not deal exclusively with the instrumentation field of magnetic recording.

Although the five items are presently up-to-date, they are subject to continuing revision. For instance, the revised W-T-0070 (Navy Ships) series (Item 3) will soon be "on the street". You can stay abreast of this ever changing business by having the latest available information in mind and at hand.

1. Inter-Range Instrumentation Group (IRIG) 106-66 Telemetry Standards
(Instrumentation Section begins with 5.6, page 25)
Available: Secretariat
Range Commanders Council
White Sands Missile Range
New Mexico, 88002
2. National Aeronautics and Space Administration (NASA)
Goddard Space Flight Center (GSFC) X-534-67-195
(Specifications for Wideband Magnetic Recorder Tape)
Available: NASA - Goddard Space Flight Center
Facilities Source Office, Code 243
Glendale Road
Greenbelt, Maryland 20771
3. Interim Federal Specifications W-T-0070 (Navy - Ships) W-T-0070/1-5
Sections 4 and 5 applicable to Instrumentation
Available: Nearest General Services Administration Regional Office
4. Set of five (5) Memorex Monographs
(Terms, Head Wear, Tape Failure Causes, Tape Production, & Evaluating
Digital Magnetic Tape)
Available: Memorex
5. Magnetic Tape Recording Handbook
Hewlett Packard Application Note 89
Available: Any Hewlett Packard Establishment

| 800 BPI 9 TRACK ORANGE | 2222-HI-3419C-A2 | | | | | | |

TERMS: Memorex Corporation offers this material delivered F.O.B. Destination to any point within the 50 states and Puerto Rico. Terms for prompt payment are 2% - 20 days; net 30. All material will be shipped from the Memorex main plant located in Santa Clara. A blanket order may be placed for delivery to several destinations and/or for several smaller orders to be delivered over a period of time and will receive price based on total quantity.

TAXES: Prices shown in this price list do not include any applicable state or local taxes.

ASSORTING PRIVILEGES: All Memorex tapes are assortable for quantity price.

DELIVERY: Within the 48 contiguous states, one (1) to five hundred (500) reels delivered within four (4) weeks; more than five hundred (500) reels delivered within sixty (60) days. Alaska, Hawaii and Puerto Rico, one (1) to five hundred (500) reels can be shipped within four (4) weeks; five hundred (500) reels or more can be shipped within sixty (60) days.

ORDERS: All orders should be mailed to the nearest branch office listed. Invoices will be submitted from Memorex Corporation in Santa Clara, California.

IBM COMPUTER SYSTEMS

Specifications

(1) **MATERIALS:** Tape to consist of a base material of Polyester film coated on one side with a strong yet flexible layer of ferro-magnetic material dispersed within a binder.

(2) **TAPE DIMENSIONS:** Tapes specified in various lengths. Up to and including 1225' lengths tolerance to be plus 20' minus 0'. Greater than a 1225' length tolerance to be plus 50' minus 0'. Width of the tape to be 0.498" with a limit of plus or minus 0.002". Total thickness for all tape to be 0.0019" or 0.00142" with a tolerance of plus or minus 0.0003". Base material thickness of 0.00145" or 0.00097" plus or minus 10%. Longitudinal curvature to be less than 3/16 per 36" of tape.

(3) **PHYSICAL REQUIREMENTS:** Oxide surface to be free of manufacturing defects. Surface of base material to be free of powder or accumulation of deleterious matter which would cause incorrect operation or necessitate increased servicing of the machines. Tape not to be spliced.

Tensile strength to be a minimum of 18 pounds for 1.5 Mil and a minimum of 12 pounds for 1.0 Mil backing.

The above "Tape Dimensions" and "Physical Requirements" are based on measurements made under the following conditions:

- (A) Tape to be rewound a minimum of three times in succession with 0.51 to 0.66 pounds tension in a room conditioned at 65° to 80° F and 40% to 60% relative humidity.
- (B) Tape to be kept under these conditions a minimum of 24 hours before tests are made.

(4) **MAGNETIC PERFORMANCE:** Magnetic performance to be measured on all 7 or 9 channels of an IBM compatible tape drive.

Average peak output, as referred to in these specifications is interpreted as the average amplitude of the voltage envelope, a minimum of 10,000 pulses sensed by the playback head operated in contact with the magnetic tape and having been recorded at 1.5 times, saturation at 800 bpi (non-return to zero method) for catalog "D tapes".

Average peak output, as referred to in these specifications is interpreted as the average amplitude of the voltage envelope, a minimum of 10,000 pulses sensed by the playback head operated in contact

with the magnetic tape and with the write current set for 1 times saturation at 1600 fci, but recorded at 3200 fci (non-return to zero method) for catalog "E tapes".

The magnetic field required for 90% saturation shall not exceed 900 oersteds.

The average peak output of a magnetic tape when compared to an IBM test tape shall not vary more than 5% from the average peak output of an IBM test tape.

No dropout of signal to occur with resultant output less than 50% of average peak output. Using a read head saturated to maximum residual magnetization, no noise signal to be greater than 10% of average peak output level. When testing for noise, tape to be saturated in one direction.

Memorex total surface tested tape is uniformly tested across the full tape width with a sensitivity equivalent to the 7 or 9 channel test.

(5) **STORAGE:** Under storage conditions of 40° to 90° F and 20% to 80% relative humidity, no deterioration of magnetic oxide, binder or base material shall take place, which will prevent the magnetic tape from meeting these specifications.

(6) **MARKERS:** Photo-sensing markers to be attached to magnetic tape as follows:

Photo-sensing marker to be not less than one inch in length. Width of marker to be 3/16" with a limit of plus or minus 1/32". Marker to consist of a transparent plastic base material with a uniform thickness of 0.0005" with a limit of plus or minus 0.0001". Vaporized aluminum coating to be sandwiched between the base and a thin layer of a pressure-sensitive, thermal setting, low cold flow adhesive.

Markers to be attached to base (uncoated) side of tape with one inch dimension parallel to edge of tape. One marker to be placed 14' with a tolerance of plus 1' or minus 0' from end of tape nearest hub of reel. Marker to be not more than 1/32" from track C edge of tape.

A second marker to be attached 10' with a tolerance of plus 5' or minus 0' from other end of tape. This marker is to be not more than 1/32" from track one (1) edge of tape. Markers not to extend beyond edge of tape. Markers to be firmly attached to tape and free of wrinkles. No adhesive material to extend beyond edge of markers.

TERMS

Net 30 days.

TRANSPORTATION CHARGES

Prices include transportation charges prepaid to any destination within the 50 states via lowest cost transportation. Title passes from Memorex to customer at point of shipment.

TAXES Prices shown in this price list do not include any applicable state or local taxes.

ASSORTING PRIVILEGES

All Memorex Computer Tapes are assortable for quantity prices.

DELIVERY

Quantities to 50 reels available from stock. Allow 10 days for larger quantities.

ORDERS

All orders should be addressed to the nearest Memorex office listed.

Warranty

Memorex warrants that new magnetic tape purchased in accordance with this price list conforms to and meets the magnetic and electrical specifications for the standard reference provided by the computer manufacturer, and that new magnetic tape purchased in accordance with this price list shall be free of any manufacturing defect, under the normal use and service for which it was designed. Memorex's obligation pursuant to this warranty shall be as follows:

(1) DAMAGED TAPE: There will be no replacement of tape damaged by either: (A) Improper handling by user personnel, (B) machine damage or (C) User non-conformance with humidity, temperature, or other storage and operating standards set forth in the Memorex specification.

(2) DEFECTIVE TAPE: A defective magnetic tape is one (other than damaged tape) which does not meet the Memorex specification.

It is recognized that the use of magnetic tape is under the exclusive control of the user, and, that it is the duty and responsibility of the user to detect promptly and report immediately to Memorex, any tape that does not meet the Memorex specifications. The user will establish reasonable controls and make effective use of available machine and program corrective features, so that defects in the tape will be detected promptly and the necessity for reprocessing data minimized.

In lieu of all other warranties, express or implied, Memorex warrants that new magnetic tape purchased in accordance with this price list shall be free of any manufacturing defect, under the normal use and service for which it was designed, for a period of one year from date of shipment from Santa Clara, California. In the event that the user determines that a manufacturing defect exists during this warranty period, he will report and return to Memorex at Santa Clara, California, the tape in question.

Memorex will retest such tape promptly. If it is determined that the tape fails to meet the Memorex specifications, Memorex will replace the tape, reel for reel, on an exchange basis and assume transportation charges (both ways) necessitated by such replacement.

If Memorex determines that the tape either meets the Memorex specifications or has been damaged by the user, or by the user's equipment, the tape will be returned to the user and the user will assume the transportation charges (both ways therefor provided).

Memorex Corporation's only liability for defective tape damages will be as specified above. The warranty expressed herein is in lieu of all other warranties, express or implied, and no other affirmation of fact or promise made by Memorex by word or action shall constitute a warranty. This warranty shall terminate with respect to each reel of tape one year and one day from date of shipment from Santa Clara, California.

TERMS: Net 30 days

TRANSPORTATION CHARGES: Prices include transportation charges prepaid to any destination within the 50 states via lowest cost transportation. Title passes from Memorex to customer at point of shipment.

Prices shown are subject to change without notice.

TAXES: Prices shown in this price list do not include any applicable state or local taxes.

ASSORTING PRIVILEGES: All Memorex computer tapes are assortable for quantity price.

ORDERS: All orders should be addressed to the nearest Memorex office listed.

Warranty

Memorex warrants that new magnetic tape purchased in accordance with this price list conforms to and meets the magnetic and electrical specifications for the standard reference provided by the computer manufacturer, and that new magnetic tape purchased in accordance with this price list shall be free of any manufacturing defect, under the normal use and service for which it was designed. Memorex's obligation pursuant to this warranty shall be as follows:

(1) Damaged Tape: There will be no replacement of tape damaged due to either: (a) improper handling by user personnel, (b) machine damage, or (c) user non-conformance with humidity, temperature, or other storage and operating standards set forth in the Memorex specifications.

(2) Defective Tape: A defective magnetic tape is one (other than a damaged tape) which does not meet the Memorex specifications.

It is recognized that the use of magnetic tape is under the exclusive control of the User and that it is the duty and responsibility of the User to detect promptly and report immediately to Memorex any tape that, in his opinion, does not meet the Memorex specifications. Such detection and reporting must be made following completion of the first "read-pass." The User will establish reasonable controls and make effective use of available machine and program corrective fea-

tures, so that defects in the tape will be detected promptly and the necessity for reprocessing data minimized.

The User will report and return to Memorex at Santa Clara, California, Memorex tape which, in his opinion, does not meet the Memorex specifications. Memorex will retest such tape promptly. If it is determined that the tape fails to meet the Memorex specifications, Memorex:

- (a) will replace the tape, reel for reel, on an exchange basis and assume the transportation charges (both ways) necessitated by such replacement.

If Memorex determines that the tape either meets the Memorex specifications, or has been damaged by the User, or his equipment, the tape will be returned to the User and the User will assume the transportation charges (both ways therefor provided).

The remedies for breach of warranty, set forth herein, are the sole and exclusive remedies of the User, and in no event shall Memorex be liable to the User for damages of any kind other than specified herein. The warranty expressed herein is in lieu of all other warranties, express or implied, and no other affirmation of fact or promise made by Memorex by word or action shall constitute a warranty.

This warranty shall terminate with respect to each reel of tape following completion of the first "read-pass" of such tape.

TERMS

Net 30 days.

TRANSPORTATION CHARGES

Prices include transportation charges prepaid to any destination within the 50 states via lowest cost transportation. Title passes from Memorex to customer at point of shipment.

TAXES Prices shown in this price list do not include any applicable state or local taxes.

ASSORTING PRIVILEGES

All Memorex Computer Tapes are assortable for quantity prices.

DELIVERY

Quantities to 50 reels available from stock. Allow 10 days for larger quantities.

ORDERS

All orders should be addressed to the nearest Memorex office listed.

Warranty

Memorex warrants that new magnetic tape purchased in accordance with this price list conforms to and meets the magnetic and electrical specifications for the standard reference provided by the computer manufacturer, and that new magnetic tape purchased in accordance with this price list shall be free of any manufacturing defect, under the normal use and service for which it was designed. Memorex's obligation pursuant to this warranty shall be as follows:

(1) DAMAGED TAPE: There will be no replacement of tape damaged by either: (A) Improper handling by user personnel, (B) machine damage or (C) User non-conformance with humidity, temperature, or other storage and operating standards set forth in the Memorex specification.

(2) DEFECTIVE TAPE: A defective magnetic tape is one (other than damaged tape) which does not meet the Memorex specification.

It is recognized that the use of magnetic tape is under the exclusive control of the user, and, that it is the duty and responsibility of the user to detect promptly and report immediately to Memorex, any tape that does not meet the Memorex specifications. The user will establish reasonable controls and make effective use of available machine and program corrective features, so that defects in the tape will be detected promptly and the necessity for reprocessing data minimized.

In lieu of all other warranties, express or implied, Memorex warrants that new magnetic tape purchased in accordance with this price list shall be free of any manufacturing defect, under the normal use and service for which it was designed, for a period of three years from date of shipment from Santa Clara, California. In the event that the user determines that a manufacturing defect exists during this warranty period, he will report and return to Memorex at Santa Clara, California, the tape in question.

Memorex will retest such tape promptly. If it is determined that the tape fails to meet the Memorex specifications, Memorex will replace the tape, reel for reel, on an exchange basis and assume transportation charges (both ways) necessitated by such replacement.

If Memorex determines that the tape either meets the Memorex specifications or has been damaged by the user, or by the user's equipment, the tape will be returned to the user and the user will assume the transportation charges (both ways therefor provided).

Memorex Corporation's only liability for defective tape damages will be as specified above. The warranty expressed herein is in lieu of all other warranties, express or implied, and no other affirmation of fact or promise made by Memorex by word or action shall constitute a warranty. This warranty shall terminate with respect to each reel of tape three years and one day from date of shipment from Santa Clara, California.

TERMS

Net 30 days.

TRANSPORTATION CHARGES

Prices include transportation charges prepaid to any destination within the 50 states via lowest cost transportation. Title passes from Memorex to customer at point of shipment.

TAXES Prices shown in this price list do not include any applicable state or local taxes.

ASSORTING PRIVILEGES

All Memorex Computer Tapes are assortable for quantity prices.

DELIVERY

Quantities to 50 reels available from stock. Allow 10 days for larger quantities.

ORDERS

All orders should be addressed to the nearest Memorex office listed.

Warranty

Memorex warrants that new magnetic tape purchased in accordance with this price list conforms to and meets the magnetic and electrical specifications for the standard reference provided by the computer manufacturer, and that new magnetic tape purchased in accordance with this price list shall be free of any manufacturing defect, under the normal use and service for which it was designed. Memorex's obligation pursuant to this warranty shall be as follows:

(1) DAMAGED TAPE: There will be no replacement of tape damaged by either: (A) Improper handling by user personnel, (B) machine damage or (C) User non-conformance with humidity, temperature, or other storage and operating standards set forth in the Memorex specification.

(2) DEFECTIVE TAPE: A defective magnetic tape is one (other than damaged tape) which does not meet the Memorex specification.

It is recognized that the use of magnetic tape is under the exclusive control of the user, and, that it is the duty and responsibility of the user to detect promptly and report immediately to Memorex, any tape that does not meet the Memorex specifications. The user will establish reasonable controls and make effective use of available machine and program corrective features, so that defects in the tape will be detected promptly and the necessity for reprocessing data minimized.

In lieu of all other warranties, express or implied, Memorex warrants that new magnetic tape purchased in accordance with this price list shall be free of any manufacturing defect, under the normal use and service for which it was designed, for a period of one year from date of shipment from Santa Clara, California. In the event that the user determines that a manufacturing defect exists during this warranty period, he will report and return to Memorex at Santa Clara, California, the tape in question.

Memorex will retest such tape promptly. If it is determined that the tape fails to meet the Memorex specifications, Memorex will replace the tape, reel for reel, on an exchange basis and assume transportation charges (both ways) necessitated by such replacement.

If Memorex determines that the tape either meets the Memorex specifications or has been damaged by the user, or by the user's equipment, the tape will be returned to the user and the user will assume the transportation charges (both ways therefore provided).

Memorex Corporation's only liability for defective tape damages will be as specified above. The warranty expressed herein is in lieu of all other warranties, express or implied, and no other affirmation of fact or promise made by Memorex by word or action shall constitute a warranty. This warranty shall terminate with respect to each reel of tape one year and one day from date of shipment from Santa Clara, California.

INTEROFFICE CORRESPONDENCE

TO: Ken Taylor

DATE: 18 March 1968

FROM: Don Bench

COPY TO: Cal Strobele

SUBJECT: HELICAL SCAN RECORDERS AND TAPE

In response to your request here is a summary of some of the helical scan video tape recorders now on the market and the tape presently recommended for these recorders by Memorex and 3M.

1/2" helical scan video

| Recorder | T a p e | | |
|------------------|---------|------|---|
| | 3M | Mem. | |
| Concord VTR600 | 351 | 79L | Qualified product 79L was qualified on Sony CV2000 as product for all 1/2" helical scan recorders. Exact history unknown. |
| Craig 6401 | 351 | 79L | |
| Panasonic NV7000 | 351 | 79L | Rho tape would offer an approximate 3 db improvement in S/N ratio for all of these recorders over 79L. |
| Panasonic NV8000 | 351 | 79L | |
| Panasonic NV8100 | 351 | 79L | |
| Shibaden SV700 | 351 | 79L | " |
| Shibaden SV1000 | 351 | 79L | " |
| Shibaden 7624H | 351 | 79L | " |
| Sony SV300 | 351 | 79L | " |
| Sony CV2000 | 351 | 79L | " |
| Wollensak VTR150 | 355 | 79L | No qualified product, but it is assumed that 79L would work. |

1" helical scan video

| Recorder | T a p e | | |
|--------------------------|---------|-----|---|
| | 3M | Mem | |
| Ampex VR5000 | 357 | 79P | Qualified product, history unknown. Product qualified on Ampex VR7000. |
| Ampex VR6000 | 357 | 79P | " |
| Ampex VR7000 | 357 | 79P | " |
| Ampex VR7500C | 357 | 79P | " |
| Ampex VR7800 | 357 | 79P | " |
| Dage DV200 | 351 | 79P | No qualified product, but it is assumed that 79P would be satisfactory. |
| Dage DV300 | 351 | 79P | " |
| Diamond Power DP-2 | 388 | 79P | " |
| Diamond Power DP-3 | 388 | 79P | " |
| Ikegami TVR-311 | 351 | 79P | " |
| | | | (Not sure if this recorder is the same as Westinghouse TG-30-C-17A) |
| IVC 500 | 351 | | New low cost recorder to be available in fall of 1968. |
| IVC 800 | 351 | | No qualified product, 79P will not work due to poor S/N ratio. |
| Norelco EL3400 | 351B | 79K | Qualified product, history unknown. |
| Panasonic NV204 | 351 | 79P | No qualified product, 79P probably all right. |
| Precision Inst. PI-3V | 350 | 79P | Qualified product, history unknown. |
| Precision Inst. PI-4V | 350 | 79P | " |

HELICAL SCAN
RECORDERS AND TAPE

-3-

18 March 1968

| Recorder | T a p e | | Mem |
|-----------------------------|---------|-----|--|
| | 3M | | |
| Precision Inst. PI7100 | 350 | 79P | Qualified product, history unknown. |
| Shibaden VRM416 | | | No qualified product |
| Sony EV200 | 350 | 79S | No qualified product, but we are presently shipping 79P as 79S. The "K" thickness of 79 and 78 tapes both seem to clog on this recorder. 79N has never been evaluated. |
| Sony EV210 | 350 | 79S | |
| Westel WRR101 | | 62J | No qualified product, but they are presently using 62J. |
| Westel WR201 | | 62J | " |
| Westel WRR301 | | 62J | " |
| Westinghouse TG-30-C-17A | 351 | 79K | Qualified product as of May 1967 |

2" helical scan video

| | | | |
|--------------|------|-----|---|
| Ampex VR660 | 350 | 79V | Qualified product, history unknown. |
| Ampex VR1500 | 350 | 79V | " |
| Sony PV100 | 350B | 79N | Qualified product. Longitudinally oriented 78V, qualified in October of 1967. |
| Sony PV120U | 350B | 79N | |

Note - All of the helical scan recorders other than the Ampex VR7000 type, the Westel recorders, and perhaps the Norelco EL3400 would better their S/N ratio by approximately 3 db through the use of a fine particle tape such as Rho.

INSTRUMENTATION AND DIGITAL TAPE FOR USE ON THE LEACH MTR-3200 RECORDER/REPRODUCER

These configurations have been specifically designed for optimum performance on the Leach Corporation MTR-3200 Tape Recorder/Reproducer. A special lightweight precision metal reel is used. Some of the configurations below are provided with beginning and end of tape sensing strips designed to match the tape recorder requirements. All configurations are wound on reels which conform to EIA standards.

| CONFIGURATION | DIMENSIONS | TYPE REEL | SENSING STRIPS | QUANTITY | | | |
|---|------------|-----------------|----------------|----------|---------|---------|---------|
| | | | | 1-99 | 100-249 | 250-999 | 1000+ |
| Recommended for use on all extended bandwidth systems (250 kHz) | | | | | | | |
| 62L-GI-6152B-M2 | ½" x 2300' | Precision Metal | Yes | \$34.47 | \$33.74 | \$32.31 | \$31.62 |
| 62L-GI-6152B-W1 | ½" x 2300' | Precision Metal | No | 32.47 | 31.74 | 30.31 | 29.62 |
| 62L-OI-7053B-M3 | 1" x 2300' | Precision Metal | Yes | 57.50 | 56.33 | 54.03 | 52.91 |
| 62L-OI-7053B-W1 | 1" x 2300' | Precision Metal | No | 55.50 | 54.33 | 52.03 | 50.91 |
| Recommended for use on all standard bandwidth systems (100 kHz) | | | | | | | |
| 42J-GH-6152B-M2 | ½" x 1800' | Precision Metal | Yes | 26.44 | 25.86 | 24.74 | 24.20 |
| 42J-GH-6152B-W1 | ½" x 1800' | Precision Metal | No | 24.44 | 23.86 | 22.74 | 22.20 |
| 42J-OH-7053B-M3 | 1" x 1800' | Precision Metal | Yes | 41.45 | 40.58 | 38.89 | 38.07 |
| 42J-OH-7053B-W1 | 1" x 1800' | Precision Metal | No | 39.45 | 38.58 | 36.89 | 36.07 |
| Recommended for use on all NRZ digital systems | | | | | | | |
| 22U-HF-6152B-W1 | ½" x 1225' | Precision Metal | No | 37.60 | 36.05 | 32.92 | 32.31 |

| Memorex Mark I Disc Pack TOP COVER of LEXAN. [®] Designed for Memorex Mark I Disc Pack but interchangeable with most top covers of IBM Type 1316. Unconditionally warranted against accidental breakage. | 130-00-04 | \$25.00 each |
| Memorex Mark I Disc Pack BOTTOM COVER of LEXAN. [®] Designed for Memorex Mark I Disc Pack but interchangeable with most bottom covers of IBM Type 1316 Disc Packs. Unconditionally warranted against accidental breakage. | 130-00-03 | 10.00 each |
| Memorex Mark I Disc Pack TRANSPORTER. Custom designed individual disc pack transporter in modern luggage configuration without any special identification to reduce chance of pilferage. Custom molded insert insures adequate disc pack protection against normal shock and vibration. Masculine case will fit under most airline seats. The Memorex TRANSPORTER may also be used for other disc packs. | 130-00-54 | 52.50 each |
| Memorex BEZEL LABELS have been designed to be inserted inside the disc pack bezel. It is recommended that marking materials should have the capability of being removed with 91% isopropyl alcohol. Erasing of BEZEL LABELS is not recommended due to the possibility of adding contamination into the disc pack. Additional bezel labels may be placed on top of the existing label if changes are needed. | 130-00-55 | .25 each |

®Registered Trade Mark of General Electric Co.

TERMS

Net 30 days.

TRANSPORTATION CHARGES

MEMOREX WRAP-AROUND TAPE CONTAINERS

MEMOREX WRAP-AROUND CONTAINERS FOR SOLID FLANGE COMPUTER REELS

- 30% thinner, 80% lighter than conventional containers — saves valuable storage space.
- Simple lock-action clasp eliminates frequent jamming that so often occurs with regular containers.
- More positive protection against dust and contamination.
- Integral stacking ring permits non-slip piling of reels.
- Positive protection against flanges "pinching" and damaging tape edges.
- Modestly priced — immediately available from stock.
- Easier to handle — saves time, saves trouble.

FEATURES

New Memorex wrap-around tape containers for solid-flange reels actually reduce your library and storage space requirements by more than 30%. In the space you now need to store 100 reels, you can store almost 150 reels; 1000 reels, almost 1500 reels.

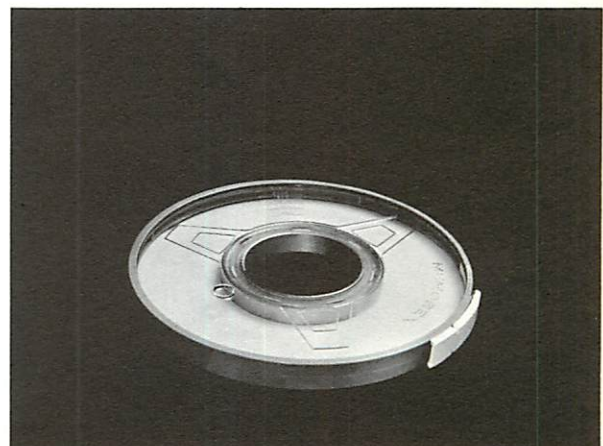

There are other advantages, too. More positive tape protection. Special grooves hold flanges in the ideal position, eliminating possible pinching of tape edges. Groove cushioning material creates a positive anti-contaminant seal between reel and belt.

Memorex wrap-around containers are made from durable Lexan plastic that withstands even the most abusive handling.

THE NEW MEMOREX WRAP-AROUND TAPE CONTAINER

Convenient, practical and priced below conventional containers. Styles for 10½-inch solid-flange computer reels. Made from durable Lexan plastic. Positive snap-lock action guaranteed against failure.

NEW LIGHTWEIGHT MEMOFOAM TAPE CONTAINERS

NEW MEMOFOAM CONTAINERS FOR COMPUTER AND INSTRUMENTATION TAPES

- Positive Extra Protection • Environment-Stabilizing • Only 26 or 30 ounces • Low Cost • Reduces Shipping Expense • Packed in 200-pound Test Corrugated Cartons

FEATURES

New MemoFoam containers fill the long-standing need for improved protection of computer and instrumentation tapes against temperature extremes and rough handling during shipping and storage.

Manufactured from foamed polystyrene to give cushioning superior to any other tape container available.

MemoFoam containers will maintain tapes at near-room temperatures for more than two hours under temperature extremes of -70° or 170°F . Tapes will remain at near-room temperatures for far longer durations—up to several days—under lesser extremes.

The two MemoFoam halves lock together with mortise joints and may be sealed with $\frac{1}{2}$ -inch filament tape. Containers come packed in 200-pound test corrugated cartons.

TERMS

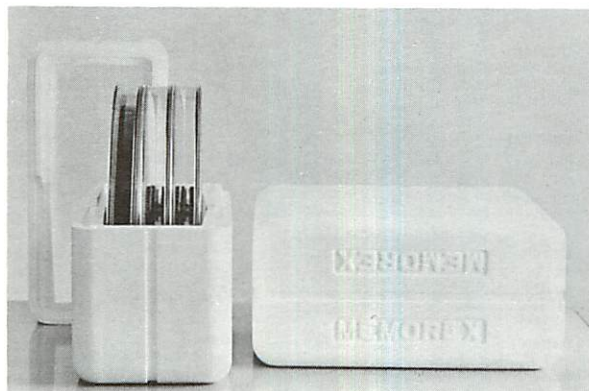

F.O.B. Santa Clara, California. Net 30.

TAXES

Prices shown do not include any applicable state or local taxes.

ORDERS

All orders should be mailed to Memorex Corporation, 1180 Shulman Avenue, Santa Clara, California. Telephone 248-3344; Area Code 408. Invoices will be submitted from Memorex Corporation, Santa Clara, California.

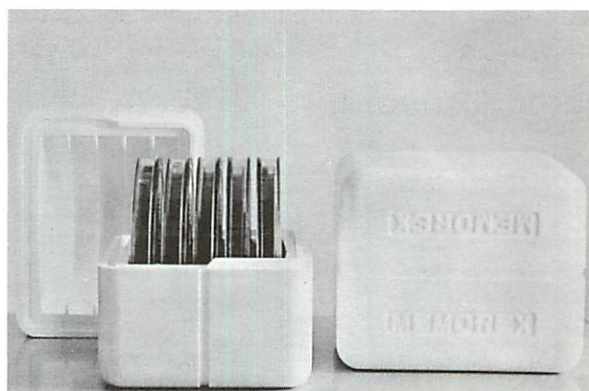

FOR INSTRUMENTATION TAPES

Holds three 14" reels of instrumentation tape ($\frac{1}{2}$ " or 1" wide tape in plastic cases) or five $\frac{1}{2}$ " tapes in metal case. Price includes 200-pound test corrugated carton.

CATALOG NUMBER 509-661-00

PRICE (when ordered with Memorex tape) . . \$4.00 ea.

PRICE (when ordered alone) \$5.00 ea.

FOR COMPUTER TAPES

Holds five 10 $\frac{1}{2}$ " reels of computer tape ($\frac{1}{2}$ " or 1" wide tape in plastic cases). Price includes 200-pound test corrugated carton.

CATALOG NUMBER 509-660-00

PRICE (when ordered with Memorex tape) . . \$3.00 ea.

PRICE (when ordered alone) \$4.00 ea.
